## FM•CONNECT

FM Radio Control System  
for DC, AC and Hydraulic Winches

### RELIABLE • EFFICIENT • WEATHERPROOF

Combines all the best features of existing radio control systems currently available – PLUS new, additional benefits.

The **FM•CONNECT** can also be used in conjunction many BHW systems, including:

**REEL•SMART**

**PLANT•MASTER**

**CARPET•TUG**

**POWER•WEDGE**

**RAMP•ASSIST**

and several hydraulic and electric winches – ask sales for details.

*In consultation with professional users of radio control products, the BHW Group, leading UK winch specialists, are pleased to offer FM•CONNECT a new, tough, reliable radio control system.*

*Can be used with DC, AC (1PH & 3PH) and HYDRAULIC winches.*

*The specially designed receiver and transmitter enclosures ensure all weather protection.*

*Reliable FM Technology, together with easy installation makes FM•CONNECT a favourite choice for commercial and industrial winch users.*

*Easy installation and replacement - the wiring harness is already installed into the receiver and is connected by simple plug-in connectors.*

*Freedom of movement and control - FM•CONNECT makes vehicle recovery or the job of loading plant and machinery much easier and safer for the operator. Work is completed quickly and efficiently.*

*The transmitter can be self-coded, simplifying installation and replacement if this should become necessary.*

*Compliant to 2014/53/EU*

## EXCEPTIONAL RELIABILITY

- **FM System**

The latest technology by one of Europe's leading industrial radio control specialists.

- **Suitable for DC, AC and HYDRAULIC winches**

- **Weatherproof**

The receiver and transmitter enclosures are custom made to provide protection to IP65. The Heavy Duty material used and its design prevents distortion from rapid climate changes ensuring maximum protection of electronic components.

- **Quick easy installation**

The receiver box is pre-wired with a 500mm tail terminating in a waterproof plug. The 3m harness provided is pre-wired with the mating plug so the job of installing or replacing the receiver is quick and easy.

In the case of hydraulic winches the BHW Group can supply fully integrated electric pneumatic control valves and **FM•CONNECT** will come supplied pre-wired ready to install saving you time.

- **Transmitter**

Purpose made for toughness and ease of use, incorporating a bonded rubber surround for additional protection. Loss or damage to the remote control is easily remedied by simply recoding a replacement -should this become necessary.

**GIVE OUR TECHNICAL SALES TEAM A CALL TO DISCUSS ANY WINCH INSTALLATIONS YOU ARE CONSIDERING - WE ARE HERE TO ADVISE AND HELP IN ANY WAY WE CAN.**
